# YOUTH ENTREPRENEURSHIP SKILLS (YES) CLINICS

---

## **WE AIM TO EMPOWER YOUTH TO SOLVE REAL-WORLD CHALLENGES**

Merging the entrepreneurial processes and technology to provide the best mind-transforming education and practical work-related skills for youth

## **WHAT WE DO**

The Youth Entrepreneurship Skills Clinics are designed to equip youth with entrepreneurial mindsets and practical work-related skills by solving real-world challenges faced by local businesses in local communities

## **WHY WE DO IT**

The purpose of this project is to address economic challenges and youth employability and job-retention issues in urban communities through high tech entrepreneurship education in connection with the business community, which we believe is critical mission for the future of the nation

# YOUTH ENTREPRENEURSHIP SKILLS (YES) CLINICS

---

## OUR PROCESS

Our process is built for flawless collaboration and sustainable operation of the programming in local communities.

In this sense, youth work presents itself as a promising opportunity for combining traditional approaches to the promotion of innovation and entrepreneurship with work targeting disadvantaged groups of young people and aiming at social activation and inclusion.

Consequently, our main objective with this project is to provide to youth all the necessary work-related skills and competencies in order to be able to be competitive in the local job market

### **The specific objectives to achieve or goals are:**

-To provide youth a better understanding of entrepreneurship and the role of non-formal learning in supporting entrepreneurship among young people.

# YOUTH ENTREPRENEURSHIP SKILLS (YES) CLINICS

---

-To give youth practical methods, tools and practices that they can adopt and adapt to their context and so make it easier to gain employment and / or promote entrepreneurship among young people.

-To promote peer learning activities in order to enhance the skills and competences of youth in delivering entrepreneurial learning.

-To explore existing programs supporting youth employment and youth entrepreneurship.

The project will be managed by partners in a collaborative way, based on collective intelligence and regular communication.

The project will have direct, positive effects on the different participants as they will acquire more specialized knowledge on entrepreneurial education and the importance of entrepreneurship for young people, transversal competences, perception of self-esteem and a positive sense of belonging to the wider community, and through the peer-learning among youth workers there will be concrete opportunities of intercultural contact as well as up-skilling professional competences.
